

# OASIS

*Serving seniors with vision loss*

## What is OASIS?

OASIS, a program of the Alabama Department of Rehabilitation Services, is dedicated to assisting Alabamians 55 and older who have vision problems in living more independently in their homes and communities.

This statewide program is federally funded and operates through a network of skilled rehabilitation professionals. These vision rehabilitation professionals are trained to identify your individual needs and recommend the services to help you overcome the barriers that limit your independence.

Services are at no cost to the participant and are available regardless of financial need.

## What services does it provide?

The OASIS team of highly qualified vision rehabilitation therapists and orientation and mobility specialists understands the impact of vision loss on daily life. We take special care to design a program of services that meets your personal goals and interests.

Services may include:

- instruction in independent living skills
- low-vision evaluations and aids
- mobility instruction in the home and community
- adaptive equipment
- information and referral
